## **Fujitsu General Introduces the Smarter Building Controller**

Fujitsu General's new *Smarter Building Controller* – introduced by Fujitsu General and technology partner, Ventacity Systems – offers an easy to use, plug-and-play building management system for use with Fujitsu General's Airstage heating, ventilation and cooling systems.

The new Smarter Building Controller offer seamless integration with installed equipment, and control is performed via Internet connection through simple interface from any connected device. Role-based permissions facilitate easy setup and use, with advanced users able to generate system performance reports, system alerts, and access to service diagnostic screens.

The system gives you the option to use a secure cellular LTE network, making complicated IT unnecessary and giving your building owner extremely secure connectivity and control.

The new controls provide better control and usability at a much lower price point, an advantage that stems from reductions in hardware and labor. No expensive field controllers are needed at control points and no specialized programing is required.

**Fujitsu General America** is a leading provider of ductless cooling + heating systems, and VRF technology for commercial and residential use. Fujitsu General's ductless heating, ventilation and air conditioning (HVAC) systems are extremely energy efficient and allow for temperature control by individual room for maximum comfort. For more information, call (888) 888-3424 or visit [www.fujitsugeneral.com](http://www.fujitsugeneral.com).

**Ventacity Systems** is passionate about making buildings healthier, more efficient and smarter. Ventacity's family of ultra-efficient ventilation products are enabling a new generation of energy-efficient HVAC designs for new buildings and replacing rooftop unit-driven HVAC systems in existing buildings. The new Ventacity HVAC<sup>2</sup> Smarter Building Platform™ is a portfolio-wide, whole-building management platform that integrates and networks all the HVAC equipment, optimizing efficiency, health, and comfort for the entire building portfolio. It is designed to be plug-and-play simple so contractors can save valuable installation and maintenance time and control costs. Ventacity is based in Portland, Oregon.
